

ALERT:

*Deadly fish virus,
viral hemorrhagic septicemia,
now found in all Great Lakes*

— Duluth News Tribune —

**Stop your boat from spreading fish disease.
Be responsible. Clean it out. Wash it down.**

- Thoroughly clean and dry your boat and trailer before using again
- Empty all water from equipment before transporting
- Remove all mud, plants, and aquatic life from equipment
- Do not move fish or plants from one body of water to another

**Boating is fun. Cleaning up when
you're done is being responsible.** www.focusonfishhealth.org
